Vehicle Details

CAR NUMBER

ENGINE TYPE

VEHICLE MAKE

FORCED INDUCTION

YES

NO

VEHICLE YEAR

RACING WEIGHT (kg)

VEHICLE MODEL

Note: an automobiles racing weight is the weight as the automobile is driven on track including driver and all safety equipment

PEAK POWER

of the engine in **Horsepower** as measured at the flywheel

(hp) at RPM

OR,

PEAK POWER

of the engine in **Kilowatts** as measured at the flywheel

(kw) at RPM

MAXIMUM INLET
MANIFOLD PRESSURE
(BOOST)

kPa (absolute)*

*NOTE: Maximum inlet manifold pressure, measured in kPa A (Absolute), is the measurement of pressure inside the inlet manifold where 0 kPa A is full vacuum, 100 kPa A is the manifold pressure when the engine is switched off (approximately), and pressures above 100 kPa A being boost. For example, a measurement of 200 kPa A pressure in the manifold would equate to 100 kPa A (14.5 psi) of boost.

Declaration

I, the undersigned, declare that the information provided on this form is accurate to the best of my knowledge.
